

Royal Commission on Banking at Edmonton

Edmonton, Aug. 21.—"Cheap money" was the request which stood out today when the Royal Commission on Banking, held a busy sitting here. Harry Bell, farmer of Nanton, who made his position as identical with thousands of other agriculturists in western Canada, told how debts made on the basis of \$1 and \$1.50 wheat were now waiting to be paid with wheat selling at half the price.

"I hear farmers say, for the love of mercy get us cheap money," Mr. Bell said to the commission. "The banks are not to blame," he asserted. "They have been all right, but the farmers in many cases have overdeveloped, had broken too much land and they had borrowed when times were good."

Today's sitting also brought expression of the view that "rental control" was one of the handicaps which western borrowers are called upon to meet. A. D. Martin of Edmonton, furnished Lord Macmillan and his fellow-commissioners with instances, which he claimed came from his own personal experience, where loans had been refused by eastern head offices of banks, even though good security was offered. He suggested the establishment of provincial banks, which would act as appeal boards from the decision of banks in matters of credit.

Representations received by the commission today came from a variety of sources. Opening with the brief of the provincial government, in which a central bank was given support and a policy which would enlarge wheat markets urged, the commissioners were offered suggestions from the Edmonton Chamber of Commerce, the city of Edmonton, W. R. Howson, leader of the Liberal party in Alberta; Joseph A. Clarke, representing the Edmonton Economic Union and others in the farming, business and economic life of the city and province.

General support for the establishment of a national central bank was given. The Edmonton Chamber of Commerce emphasized the necessity for cheap money. Mr. Clarke submitted a plan for what he termed the "bank of public credit" in which provision was made for a federal board of nine members, each representing a different province, and a central bank of Canada.

"We sincerely hope that any suggestions made by the commission will take cognizance of the serious social crisis that confronts cities such as Edmonton," Mayor D. K. Knott of this city told the commissioners. Mayor Knott submitted a brief on behalf of the city. Problems of the city were common to those which had already made representations, he said.

It could not be said too often, the mayor continued, that "the interest debt-building and our monetary system has loaded such a burden of annual debt charges on this city as to cripple the discharge of those essential services of the people for which community organizations exist."

"We are convinced that such social organizations have reached the end of their tether under the present financial arrangements," said Mayor Knott. "We cannot meet these increasing debt charges and also discharge our social functions."

The brief also stated that "we view with alarm a financial system, however sound, that fails to bring into the community the life-giving blood of its adoption was the immense cost to carry it on. It would cost \$13.75 per year for every man, woman and child in the province or total yearly sum of \$10,000,000.00. It was obvious that this amount could not be raised by direct taxation as the taxes already imposed to pay, and it was out of the question to raise them to any extent. He did, however, favor the collection of Sweptstakes, the net proceeds to be used to pay the cost of State Medicine. With so many forms of

idle men and idle resources into some fruitful relationship."

A brief was submitted by W. R. Howson, leader of the Liberal party in Alberta, and by J. A. Clarke, leader of the Conservative party. Mr. McBride explained that the brief was not filed as an official statement in a political sense, of the position of the Liberal party in Alberta, "but rather as representing some common grounds held by that large body of Alberta citizens, namely, all those of Liberal views and ideas, whose voice might not otherwise be heard."

These citizens felt the brief stated that the Canadian banking system has in recent years "fallen short of modern requirements and of meeting the unfortunate conditions which have prevailed in Alberta."

Establishment, at the next revision of the Bank Act, of a central national bank of redress "to direct and control the issue of currency and the extension of credit through the banks of this country," was endorsed in the brief. It urged abandonment of the gold standard "at least for the present time and for so long as Great Britain and the United States remain on gold."

"We feel that no man should at one and the same time be a borrower and lender to himself," Mr. Howson's brief asserted. "We say that he has no right to pass on loans in which he is directly or indirectly interested. For this reason we strike at interlocking directorates and we urge the commission to recommend statutory amendments prohibiting anyone from acting at the same time as a director of a bank and as a director of any corporation or owner of any business borrowing from that particular bank."

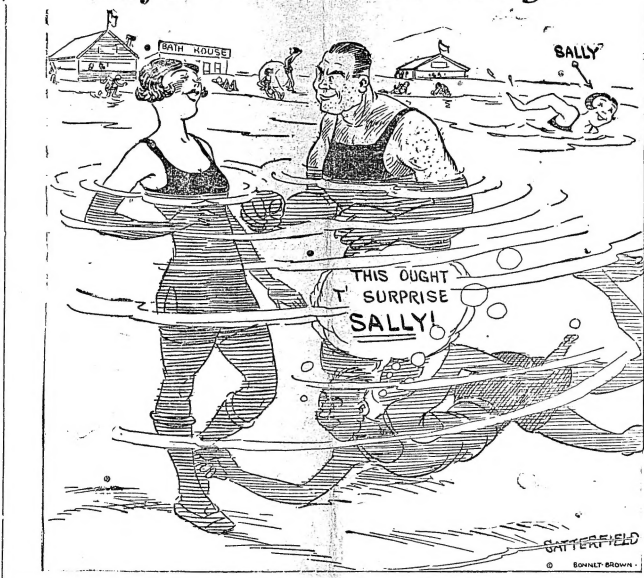

"I would like to draw the attention of the commission to the terrible mortality of Canadian banks," said A. D. Martin, manager of the Saskatchewan Life Insurance Company. "The number of Canadian banks had decreased from 34 to 9 in a quarter of a century. Our difficulty is not that we have too many banks, but that we have too few banks."

Mr. Martin suggested the appointment of provincial bankers' committees to meet with the commission and to keep close touch with the situation. He felt that such a system would result in overcoming many of a borrower's difficulties in getting money. These committees might act as appeal boards from decisions of banks on matters of loans.

Joseph A. Ross, of Edmonton, asserted that he held, as a lawyer, being required to enforce payment on loans bearing interest from nine to 25 per cent compounded. He considered this too high.

Mr. Ross also stated that he was convinced that economic trouble sprang from war debts and reparations which should be adjusted. He asked the commission to draw this to the attention of the government.

Days We'll Ne'er Forget!

Wetaskiwin High School Students Make a Good Showing in Final Examinations

The results of Wetaskiwin students writing examinations in Grades XII, XI and X have just been received by the School Board and a summary shows that the Wetaskiwin school made an excellent showing, as the average percentage of all the students passing the three grades is 83.75. In Grade XII 77.51 per cent passed; in Grade XI 83.71 per cent passed; and in Grade X 85.60 per cent were successful.

The following is a list of the subjects passed by the respective students:

Grade XII.
Irene Pee—Algebra.
Ken Kinsteln—Trig. Physics.
Mars. Sorensen—Alg. Geom. Trig. French.
E. M. Bidinger—Lit. Alg. Geom. Trig. Chem. Latin. French.
Geo. D. Leach—Lit. comp. hist. alg. geom. trig. physics. chem. French.
O. B. Eason—Lit. alg. geom. trig. physics. chem. Latin. French.
O. W. Hardy—Lit. comp. hist. alg. geom. trig. physics. chem. French.

Grade XI.
Robt. S. Shaw—Hist. alg. geom. trig. physics. chem. French.
Estor E. Somers—Lit. comp. hist. alg. geom. trig. chem. French.
Ian Barry—Lit. comp. hist. alg. geom. trig. physics. chem. French.
Geo. Bieeler—French. Lit. comp. hist. alg. geom. trig. physics. chem. Latin. French.
Pearl W. Duitman—Lit. comp. hist. alg. geom. trig. physics. chem. French.

Grade X.
S. H. Plinkman—Chem. Lit. hist. comp. geom. trig. physics. chem. Latin. French.
Isabel George—Comp. geom. Latin. French.
Verna Hardy—Hist. comp. physics. chem. Latin. French.
Harry Irvine—Lit. comp. hist. alg. geom. trig. physics. chem. French.
C. O. Jevons—Comp. alg. geom. trig. physics. chem. French.
Leavert E. Johnson—Lit. comp. hist. alg. geom. trig. physics. chem. French.
Jack G. Kelley—Lit. hist. comp. geom. trig. physics. chem. French.
Clara W. Kelley—Hist. lit. comp. geom. trig. physics. chem. Latin. French.
Sybil C. Liversidge—Comp. geom. Latin. French.
Theresa McCoy—Lit. comp. hist. alg. geom. trig. physics. chem. French.
Kella McMurdo—Hist. comp. geom. Latin. French.
Marjory Montgomery—Comp. alg. geom. trig. physics. chem. French.
Harry Moore—Hist. alg. geom. trig. physics. Latin. French.
Violet Parker—Lit. physics. comp. geom. trig. physics. chem. French.
Roger Paton—Lit. hist. comp. geom. trig. physics. chem. French.
Helen Smith—Lit. comp. geom. trig. physics. chem. Latin. French.
Jean Taylor—Lit. alg. comp. hist. alg. geom. trig. physics. chem. French.
Jack Walker—Comp. hist. Lit. French.
A. Grace Williams—Hist. Lit. Phyllis Williams—Hist. geom. trig. French.

Grade XI.
Lee Wimp—Hist. French.
Norman Sorensen—French. Lit. comp. hist. alg. geom. trig. physics. chem. Latin. French.

Grade XI.
Ab. Abousafy—Geom. geom. physics.
Stena Alberge—Comp. geom. physics.

Grace Vanhulzen—Arith. hist. French.
Marjory Watson—Hist. alg. French. hist. physics. French.

Grade X.
Rene Beguin—French. French.
Florence Conde—Arith. French.
Chas. Gibson—Physics. French.
Mary Knack—Arith. alg. alg. French. French.
Margaret Stevenson—Arith. French.

PONOKA LOSES OUT IN BALL PLAYOFF
Camrose, Aug. 19.—Camrose Cubs took the second round of the Central Alberta senior baseball playoffs when the fourth Camrose-Ponoka game was forfeited to Camrose Friday, August 18, at Camrose.

D. McLennan, umpire under sanction of President Croft of the Amateur Baseball association, declared the game forfeited to Camrose on the grounds that the Ponoka team could not show all their playing certificates and would not sign their names. It appears that some of the players have been playing under assumed names.

An exhibition game which was called in the first of the eighth on account of darkness was played after the playoff game had been forfeited.

The score stood 4 to 2 for Camrose at the end of the seventh but when the battle was stopped with two gone in the first of the eighth it was 5 to 4 for Ponoka.

WETASKIWIN SCHOOL FAIR
Arrangements are progressing nicely for the school fair, which is to be held in Wetaskiwin on Friday, Sept. 8th. All trustees, teachers and others interested are requested to co-operate and make the fair this year another outstanding success. Further particulars next week.

A proposition to establish a woolen weaving and spinning industry in Alberta was under discussion in Calgary, but with no decision as yet.

Appropriation Increased 10 Per Cent. in Bigstone

A Council meeting of the M.D. Bigstone 455, was held August 15th, at Lone Ridge. Present: C. J. Hanson (reeve), M. H. Unland, O. P. Nelson, Herman Strolsch, J. R. Rickard and F. B. Green.

Minutes of July meeting were read and adopted.

Secretary read a statement of poll in connection with by-law No. 2493, a stock by-law to prohibit domestic animals from running at large in the vicinity of Malmhurst, as submitted by returning officer, H. A. Dowler.

This statement showed the by-law carried by a vote of 20 for by-law and four against. By-law No. 2493 was read for the third time and carried.

Application for relief was presented on behalf of L. Harden, on motion by Coun. Unland. The Council refused to approve relief in this case on the grounds that work was available during the harvest and that the Municipality was still willing to purchase cordwood from approved indigents.

Letter from C.P.R. was read in connection with road survey through sec. 25-46-23-4. On motion by Coun. Unland secretary was instructed to have this survey registered.

Letter from C.P.R. re road diversion effecting the N.W. 21-46-25, was read. On motion by Coun. Nelson the secretary was instructed to notify C.P.R. that it was the intention of the Council to abandon this diversion and construct road on road advance.

C.P.R. wrote re road diversion effecting N.W. 147-26-4 and S.E. 7-47-26-4. It was moved by Coun. Rickard that this matter be held for the present pending receipt of information in connection with the surveying and construction of this road.

Mrs. Ida Maine wrote stating that her old age pension of \$10 per month was not sufficient to keep her and asking Council to approve an increase. It was pointed out that the Old Age Pensions Board was reducing many pensions and that it would be useless and inadvisable to recommend an increase. Council took no further action in the matter.

T. H. Cummins offered to purchase the N.W. 6-45-27-4 and fraction S.W. 1-45-27-4. Secretary informed Council that he had received a deposit of \$20.34 with the offer to purchase. The matter was held until next meeting pending further information.

The Weed Inspector interviewed the Council in connection with his work and pointed out that his time limit was now almost expired and that he would require more time in which to cover the whole territory. It was moved by Coun. Rickard and carried that the Weed Inspector be allowed such extra time as was deemed necessary in which to complete his work.

Coun. Green moved that all divisions be voted an additional 10 per cent on their original 1932 appropriations, this to be subject to motion of June 15th whereby payment for all work performed shall be applied on taxes. Motion was carried.

Meeting adjourned.

recommen an increase. Council took no further action in the matter.

F. Maine offered to purchase the N.W. 6-45-27-4 and fraction S.W. 1-45-27-4. Secretary informed Council that he had received a deposit of \$20.34 with the offer to purchase. The matter was held until next meeting pending further information.

The Weed Inspector interviewed the Council in connection with his work and pointed out that his time limit was now almost expired and that he would require more time in which to cover the whole territory. It was moved by Coun. Rickard and carried that the Weed Inspector be allowed such extra time as was deemed necessary in which to complete his work.

Coun. Green moved that all divisions be voted an additional 10 per cent on their original 1932 appropriations, this to be subject to motion of June 15th whereby payment for all work performed shall be applied on taxes. Motion was carried.

Meeting adjourned.

FARMERS MOVE TO NEW AREAS
Edmonton, August 18.—Loading of follow freight cars with settlers' effects has commenced in the Berry Creek area, the settlers moving from the drought area of southern Alberta to more northerly districts.

Some of those moving were going to Gadsby, Elmore, Bawlf and other points. They have found their own farms, some using their last tangible assets to make "down" payments on the new land and others making any arrangements possible.

Gordon Foster, A.A., said that the maximum to move from the area would be 200.

Unemployment relief in Alberta for six months ending July 31 cost \$1,329,955, covering both family and single men's relief.

Rt. Hon. MacKenzie King Goes East

Winnipeg, Aug. 20.—Rt. Hon. W. L. MacKenzie King, federal Liberal leader, left here for Ottawa tonight after spending the day quietly recuperating from the strenuous efforts of his three weeks' tour of Western Canada.

Dalhousie, N.S., August 26th.—The western tour of Rt. Hon. W. L. MacKenzie King, federal Liberal leader, came to an end Saturday night. At a great reception in the city auditorium, Mr. King was greeted by a large crowd of people.

"I have been asked if I am going to bring up the old issue of the tariff," he continued. "We have brought up the tariff. The tariff had been made an all-important issue by Prime Minister Bennett."

"Can anyone in this audience or in Canada tell me where Mr. Bennett stands on reciprocity with the United States?" he asked. "Nobody knows." The Liberal party stood square for reciprocity with the great country to the south.

There were indications, he said, that the Canadian National Railways did not receive a square deal under the present administration. Mr. King continued. The belief also existed that the Hudson Bay Railway was being discriminated against. He had not time to deal with these matters, but the Liberal party stood for preservation of the Canadian National system.

He declared there were serious constitutional difficulties which made it practically impossible to carry out the C.C.F. program. Before Canada embraced such a program this country would do well to look at conditions in European countries in which sudden changes had been made.

"This world today is in a very restless condition," Mr. King said. It was a time when conditions in other countries might easily spread to Canada. Therefore it behooved Canada to be prepared.

Britain and U. S. Control Minerals

Banff, Aug. 17.—Great Britain and United States control three-quarters of the mineral resources of the world, it was revealed today, as the fifth biennial conference of the Institute of Pacific Relations in four round table conferences explored causes of conflict in the Pacific area.

Control has passed into the hands of these nations as a result of their earlier entry into the field of heavy industry. Some of the best of the resources have been nearly exhausted while the control over the remainder leaves little for other nations to exploit.

Control over the world's mineral resources presents a problem to Japan, it was frankly recognized by non-Japanese members of the conference.

A non-Japanese member stated the continued industrial development of Japan is a reality and a factor that cannot be ignored. He declared a plan is required that will enable Japan to obtain in a fair way those natural resources required by her to maintain the economic development in which her people have shown much skill and managerial ability.

Continued study of the problem of the world's mineral resources, it was pointed out, is required that will enable countries brought out the viewpoint of productivity determined the standard of a people and not the standard of living. The productivity of standard of living would be raised by increasing productivity of goods and services but this brought into relief the matter of a better system of distribution.

Further review of conference activity brought out the matter of wheat and the statement was credited to a member involved in the wheat business that the grave fear felt two years ago with respect to competition of Russian wheat was now a thing of the past.

Work of Legislature Reviewed by Members for Leduc and Wetaskiwin

Mr. A. P. Mitchell, M.L.A., Leduc, gambling now permitted by law, and Mr. Hugh J. Montgomery, M.L.A., Wetaskiwin, addressed a large and appreciative audience in the Community hall, Breton, on Wednesday evening. The meeting was presided over by Mr. Walter Kynnes.

Mr. Mitchell, in his interesting and racy manner, gave a long list of statistics gleaned from Government reports, some of which furnished considerable amusement to the audience. He dealt in detail with the report of the committee on State Medical Aid, of which he was a member, and classed it as being recognized as the most complete report on the subject that had yet been issued in any country. He enumerated the great number of advantages which would result if the scheme was brought into effect. The stumbling block to its adoption was the immense cost to carry it on. It would cost \$13.75 per year for every man, woman and child in the province or total yearly sum of \$10,000,000.00. It was obvious that this amount could not be raised by direct taxation as the taxes already imposed to pay, and it was out of the question to raise them to any extent. He did, however, favor the collection of Sweptstakes, the net proceeds to be used to pay the cost of State Medicine. With so many forms of

Mr. Montgomery explained the legislation of interest passed at the last session of the Legislature. The object of the most important Act being to protect the farmer on his farm and the home owner in the town from losing their property if their property was mortgaged to a money lender. He mentioned the new Debt Adjustment Act, the Tax Arrears Consolidation Act, the amendment to the Crop Payments Act and the Exemptions Act.

Touching on Provincial finances he pointed out that the Provincial debt as at December 31, 1932, stood at the immense sum of \$144,000,000.00. Twenty-one months ago, on March 31, 1931, the debt amounted to \$118,000,000.00, or an increase during this period of \$26,000,000.00, or \$1,250,000.00 per month. The Government appeared to be powerless to control the finances of the Province and hold the Public Debt in check. The result is that for the current year it requires the large amount of \$7,160,000.00 to pay the interest and debt charges out of a total anticipated

Hints for the Household

(By Betty Webster)

AMERICA'S GRAIN CROPS GREATLY REDUCED

The Searle Grain Company's report on the three prairie provinces as at Aug. 11 shows a further deterioration in wheat condition. Condition in percentage now is, Alberta, 50; Saskatchewan, 46; Manitoba, 61. The weighted average for three provinces is 52. The condition of coarse grains is: Alberta 63; Saskatchewan, 46; Manitoba, 57. Scattered storms in Alberta and Saskatchewan, approximately 17 per cent of the total report, indicate some damage by frost. Threshing is expected to be general in Alberta September 4th, Saskatchewan August 24th and Manitoba August 18th.

Correspondents' preliminary estimates, based on Dominion government revised acreage, indicate total wheat crop about 75,000,000 bushels. Canadian Press despatch from Ottawa said: "Prairie farmers are not waiting for a world agreement to reduce wheat acreage—they are doing it themselves. The Dominion Bureau of Statistics reported on Thursday the acreage sown to wheat in the three prairie provinces this year declined 1,215,000 acres from 1932, a reduction of 4.6 per cent. Oat acreage increased 12,000 acres or 4.8 per cent, barley decreased 3.3 per cent, rye 26 per cent and flaxseed 47 per cent."

One of the smallest crops of grain harvested in the U.S. in this century was forecasted by the crop reporting board of the U.S. Department of Agriculture. The condition was attributed to drought damage through the middle west. The report, based on August 1 conditions, indicated the smallest wheat crop since 1893, the second smallest corn crop since 1901 and an oat crop of about one-half of that of last year. The board said the drought had affected a larger area than that in 1930, practically the whole of the U.S. being injured.

100 YEARS AGO IT WAS DIFFERENT

There was not a public library in the United States or Canada.

Almost all the furniture was imported from England.

An old copper mine in Connecticut was used as a prison.

There was one hat factory, and that made cooked hats.

Every gentleman wore a queue, and powdered his hair.

Croquet players were objected to because they dulled the knives.

A gentleman bowing to a lady always scraped his foot on the ground.

The church collection was taken in a bag at the end of a pole, with a bell attached to arouse sleepy contributors.

Beef, pork, salt fish, potatoes and hominy were the staple diet all the year round.

Buttons were scarce and expensive and the trousers were fastened with pegs or laces.

When a man had enough to eat he placed his spoon across his cup to indicate that he wanted no more.

The church collection was taken in a bag at the end of a pole, with a bell attached to arouse sleepy contributors.

Cornwall, Ont., fire-stricken on August 8th, was ravaged a second time on Friday, when a cyclone struck it and did damage for \$75,000 to \$100,000. The storm swept a large part of the province.

DO YOU KNOW THAT:

1. Half a cup of boiled sardines, dressing and beaten makes a delicious fruit salad dressing?

2. A slice of lemon rubbed on the hands removes all fruit stains and the odor of onions, as well?

3. Tomatoes may be peeled easily if they are dropped for a minute into boiling hot water?

RECIPE Muffins

2 eggs

1 cup of milk

1 1/2 cups of flour

1 teaspoonful of salt

2 leaping teaspoonfuls of baking powder

Beat eggs until light; add milk and beat well; sift in flour, salt and baking powder, beating constantly. Pour into well greased muffin tins and bake in hot oven. This recipe will make twelve muffins.

1/2 cup of brown

1/2 cup of grey

1/2 cup of black

1/2 cup of white

1/2 cup of green

1/2 cup of yellow

1/2 cup of orange

1/2 cup of purple

1/2 cup of brown

1/2 cup of grey

1/2 cup of black

1/2 cup of white

1/2 cup of green

1/2 cup of yellow

1/2 cup of orange

1/2 cup of purple

1/2 cup of brown

1/2 cup of grey

1/2 cup of black

1/2 cup of white

1/2 cup of green

1/2 cup of yellow

1/2 cup of orange

1/2 cup of purple

1/2 cup of brown

1/2 cup of grey

1/2 cup of black

1/2 cup of white

1/2 cup of green

1/2 cup of yellow

1/2 cup of orange

1/2 cup of purple

WHEAT MARKET WAS PEGGED AT WINNIPEG

Prices at Winnipeg have been sustained by a pegged price for the first time in history. The market has been weak, with prices occasionally bobbing upward a little, only to close near the pegged level and at times unable to absorb offerings. This led to arrangements being made on the exchange to handle a large quantity of grain country elevators, which allowed them to continue daily purchases at market levels. Otherwise the grain country elevators would have had to carry the risk on all purchases, and this would have meant lower cash prices. The crash came when Chicago market was pegged at levels of July 31, and millers and United States speculators alike hedged and sold in Winnipeg, causing a violent reaction. The market was broken when Chicago pegs were removed and Canadians to peg prices as they stood.

BEING BEAUTIFUL

Back in the time of Jezebel, the girl who was said to have painted her face so shamefully red brick dust was used for rouge. A little later, the Chinese introduced a new form of rouge made from Salvia flower. This was a green preparation spread on cards that, when moistened, turned carmine. After that, a rouge known as Spanish paper was introduced, the belief of the time. This was a reddish preparation sold in books of rouge-paper, generally manufactured to Spain.

Of course, if one considers all these antecedents of the present day rouge, one might well be inclined to say that the modern cosmetic. For the basic ingredients of these past forms of cheek coloring seem anything but what might be called the skin. But we're personally inclined to believe that the reason some women have the idea that rouge is harmful to the skin is more because of disparaging comments made by reformers of the past than by actual knowledge of the present rouge ingredients.

A good many women have the idea that rouge is harmful to the skin is more because of disparaging comments made by reformers of the past than by actual knowledge of the present rouge ingredients.

There are, at present, three common types of rouge. These forms are the liquid, paste, and dry rouges. The liquid rouge, if applied with infinite skill, gives the most beautiful and lasting result. The parent and does not conceal the texture of the skin. However, this form of rouge is quite difficult to apply.

Paste rouge is generally considered the best type to be used by the dry-skinned individual. Because of its creamy form, it helps to keep such skin smooth and supple. Paste rouge should be applied in three triangular-shaped dots on the cheeks with a fingertip, and then blended smoothly. And a thin film of powder should always be applied over it to give the most natural effect.

The dry rouge is easiest to apply most liberally, and consequently, it is our personal preference. It is generally best to apply a basic coating of powder before blending the dry rouge on the skin. And after this the rouge should be smoothed over the skin, and the edges blurred until the color looks as natural as a blush.—Exchange.

A MERCHANTS' PICNIC

Port Alberni merchants closed their stores all day yesterday to picnic at Smith's Landing, Strait Lake. Their customers were invited to join with them.

There was when Chilliwack merchants would hook up together and hold a monster picnic at the fair grounds. They got a great kick out of working for a common object, while customers were delighted to meet the purveyors of goods and services on the picnic grounds.

Since that time the community has become a possessor of the finest summer resort and picnic ground on the Lower Mainland, and we suggest that the merchants of the city could not do better than revive the

annual picnic, and hold it at Cultus Lake. The event would afford a happy opportunity for merchants to combine in providing a day's fun and entertainment for their friends and customers. Not the least benefit from the event would be the getting-together of the merchants and business firms for one day in the year.—Chilliwack Progress.

The Road To Better Health

SCHOOL DAYS

(By Dr. William J. Schudes)

The summer vacation is about over. The youngsters are glad of it and thrilled with the prospect of going back to school. Yes, they are going to college.

In most homes this paper reaches there ere children of school age. Some are little fellows, others are young ladies, and still others are young men. They are all going to college.

Value Of A College Education It is for the latter group this is being written, because they are leaving home as the crabs and counsel of their parents. They are entering a new world with new associations and ideas, where the old things that will make or mar them.

Remember, indeed, is the boy or girl who can go to college, for—President Lowell of Harvard said at the recent meeting of the Associated Harvard Clubs—"The time has passed when a man can rise without an education. The demand of the public for trained men is too great. There will be an increasing demand for academic education as the country develops and the work of men becomes more and more specialized."

The Student's Obligation Young people should bear in mind, however, that a college is not a place where one can get a product that is no better than the raw material with which it works. You cannot make a silk purse out of a sow's ear.

The word "Education" means to "draw out," not to "pour in." So that any student who thinks all he has to do is to sit there and have the teacher inject an assortment of useful knowledge into his cranium has another guess coming.

The young man whose mind is a sponge will succeed—the one whose mind is a sieve will fail. The one who thinks of his work first and pleasures last will succeed; the one who regards the college simply as a useless appendage of his frat will fail. No man can attain the all-around success that can the college man; no failure is so subject as the college man who goes down.

The Importance of Health Health is an essential to a successful college career. The young men or women who disperse their vital forces in late hours, drinking, and cannot be good students. And there is plenty of opportunity at college for indulging in a vicious bent in those so disposed. Don't do it. Remember the old adage: "Mens sana in corpore sano" (A sound mind in a sound body).

Get plenty of sleep—eight hours is none too much. Exercise sufficiently to keep in good physical trim. Get enough healthful recreation to keep from growing dull.

Keep your eye on the future—on the sweep of years that lie before you—during which you will build your life's structure on the foundation whose caissons are these college days. You will construct a lasting foundation and the superstructure cannot fail to be "A thing of beauty and a joy forever."—(Copyright).

ENTERING HIGH SCHOOL

Thousands of young men and young women, boys and girls after they get out of the grades) will enter high school this year, and if they are the right kind of young people they will get the right kind of thrill from this experience.

Entering high school is an epochal event in the life of anyone who is blessed with the opportunity. Most students never get beyond the graduation period in the high schools. At

ter that they either go to work or loaf or do a little of each. A great many young people who enter the school and graduate and that is a very sad mistake for them to make, and a still graver mistake on the part of their parents, providing the latter deliberately give their consent to a child leaving high school without graduating, when it is not necessary.

The first day in high school marks the beginning of an important event in the life of the young man or young woman who enjoys the privilege of acquiring this important education.

There will come a time in the history of this country (and it is approaching rapidly nowadays) when a young person without a high school diploma is going to find things pretty hard in this life. For education is the stepping stone to success and independence and without it all its shrewd labor and indomitable discouragement. Those who entered upon high school life today are to be congratulated. They are marching over a royal road, and paving their own life's highway so that progress will be smooth and sure.

Here and There

An orchard consisting of only one tree which has borne 116 different varieties of apples and one variety of pear, by means of careful grafting, is located in Eastern Canada. This season 47 varieties of apples put forth blossoms.

Canada produced 1,255,538 ounces of silver during May as compared with 1,307,154 ounces in February and 1,460,137 ounces in March. The total for the year was produced during the first quarter of 1933, a 17 per cent decline as compared with the same period in 1932.

Hon. Frank L. Polk, acting secretary of state for the United States in 1913-19, well-known corporation lawyer and director of many companies including the Chase National Bank and the Northern Pacific Railway, is staying at the Banff Springs Hotel with his family for the summer vacation.

More than equalling expectations the New York-Montreal cruise of the Duchess of Bedford, set a new record for the sailing of club trips recently when 300 passengers took the excursion. Guarded by a fleet of motor boats, every night and a picturesque run down the St. Lawrence, the passengers embarked steadily at the rate of three to the minute for five hours.

Wheat-cutting is now general in Manitoba and the day in the other prairie provinces, according to a recent weekly report issued by the Canadian Wheat Board. The central and southern parts of the grain-growing provinces.

Fresh from a victory in which he carried an appeal for a Chinese Canadian, the Chinese Canadian Council, ending in commutation to life imprisonment, Rev. Father Joseph S. Donovan, of Calgary, N. T., landed at Vancouver from Hong Kong aboard the Empress of Canada recently. He was granted parole at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

Seeking the fish he missed catching when he was unable to accompany their Majesties the King and Queen of Siam to Campbell River in September 1931 during their Canadian-American tour, Brig-General E. B. Panet, chief of the Canadian Pacific Investigation department, is on a trip to the waters of the fighting type, one of the prize game fish of British Columbia lakes and streams.

Cultural and educational relations in the Pacific will be stressed at the fifth Biennial Conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel, August 14-28, though economic problems will naturally be the focus of the discussions, stated Miss Elizabeth Green, editor of the Institute's Journal, on her arrival aboard the Empress of Canada at Vancouver recently en route for Banff.

Alberta's fur production for the year ending June 30 was shown in a report of the game branch to have been 1,215,084 pelts, valued at \$1,074,884, a gain in both respects over the year preceding.

KEEP EYES ON ROAD PEOPLE TURN TO RELIGION

It is dangerous to take the eyes off the road for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour his car is going at the rate of forty-four feet each second. If another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

When travelling at sixty miles an hour and approaching another car going at the same speed in the opposite direction, the two cars are coming together at the rate of 176 feet in one second. It is easy to see that in circumstances such as these it is not safe to have to look for more than a fraction of a second at the speedometer, oil gauge or any other dash device.

Exports of farm products to the United States were more than doubled in July as compared with the corresponding month of last year, said a report of the dominion bureau of statistics.

The Alberta government announced in its first quarterly financial statement for the present fiscal year a reduction of \$4,371,468 in the public debt.

Health For Young Girls Happiness For Tired Women

MILBURN'S HEART & NERVE PILLS

Thousands of young women become tired out and run down, become thin and pale, and profound weakness makes life a burden. The whole outlook of life is changed when the nervous, sick headache, the sleeplessness, the spells of dizziness, of weakness and discouragement, and the tired, languid feelings disappear with the use of Milburn's Heart and Nerve Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

SCHOOL SUPPLIES

Bring your list of school requirements here and let us save you money. We have a big selection of all kinds of school supplies. Come in early and avoid the last-minute rush.

TEXT BOOKS & SHEAFFER'S Pens and Pencils

Neighborhood NEWS

HILLSIDE

Miss Beth Howes was a Wetaskiwin visitor last Friday.

The U.F.W.A. will meet at the home of Mrs. Runie on Thursday, August 31st, when members of the Millet local will be the guests of Hillside ladies.

School will reopen Monday, Aug. 28th, with Mr. Clayton Carney as teacher.

Mr. Mackenzie of Edmonton, accompanied by Mr. T. H. Howes, attended the Christian Church Conference in Calgary last week.

Mr. and Mrs. Sheppard of Millet, were callers in the district on Sunday.

There was a good attendance at the school house on Sunday afternoon, when the Swedish Baptist Young People of Wetaskiwin, assisted by the pastor, Rev. Meyer, held Gospel service.

Mrs. Mackenzie and infant daughter and Cecil and Herbert Simpson of Edmonton, were visitors at the home of Mr. and Mrs. T. H. Howes last week.

The school house has been newly painted and some repairs made, which add greatly to the appearance of the place.

A. P. Mitchell, M.L.A., will give a talk on State Medicine, at the U. F. W. A. meeting on August 31st.

E. R. Hoskins has returned home from the University hospital, Edmonton.

SOUTHERN LAKE

Mrs. E. Scholl and son of Benalto, visited Mr. and Mrs. Johnson last week.

Mrs. Treleven Sr., is expected home from the Camrose hospital this week.

Mr. and Mrs. Alex. Edlund of Nashville district, visited with Mr. and Mrs. Ed. Johnson last week.

Mr. and Mrs. J. R. Daley, Mr. and Mrs. Russell Daley, returned to Daysland Tuesday to visit relatives and friends.

Steve Cherniawski of Camrose, is relieving Chris. Ashlund, who is on the sick list this week.

C. C. Corbett and Mr. Mackay of Edmonton, were business visitors here Tuesday.

A. L. Peterson is drilling a well for E. W. Alm.

Bill Popovich and Bill Butalla of Mayerthorpe, are here to harvest. They have taken a contract with E. W. Alm to stook his crop.

WINFIELD

Arthur Billingson had a very close call from being seriously injured on Saturday last while raking hay. In some manner he was unloading a rake and fell under the machine, fortunately the team only carried him a few paces when he managed to bring them to a stop. Billingson received a number of minor scratches and bruises, but otherwise was not badly hurt.

The stork paid a visit to the farm of Mr. and Mrs. Hubert Warner on Friday and left a seven pound boy. Both the mother and the new arrival are doing fine.

There is a great deal of activity in the staid yards at Winfield. The Elter McDougall Sawmill Company from Shere, B.C., are unloading a carload of mill machinery and equipment for their new mill at Minnehah and the planing mill at Winfield. A large number of men are engaged with horses and a caterpillar tractor preparing the heavy material for transportation to the new mill site.

J. C. McDougall enters from E. Elter, proprietors of the company, arrived Sunday by car from Shere, B.C., to superintend operations for the erection of the mill.

The C.P.R. have a bridge gang stationed at the Winfield yards, new piping is being put into position, the bridge across the Muskeg Valley received a general overhauling.

Mr. and Mrs. Frank Cadillac of Palm, old friends of Mrs. W. Tal and Mrs. S. Sabin, are spending a few days in Winfield renewing old acquaintanceship.

Mr. and Mrs. Allan of Brandon, Man., are guests at the Peerless Hotel. While stopping here Mr. Allan is looking into the matter of a seed supply from this district, as he is a representative of the McKenzie Seed Co. of Brandon.

The millwright, sawyer, blacksmith and cook for the new mill company arrived by car on Sunday from Shere, B.C., and report a very fine trip. During the stay over Sunday they were guests at the Peerless Hotel.

Mr. and Mrs. T. S. Huntley of Bentley, have been visiting with Mr. and Mrs. Harlan Walsh of Watford, West, and on Sunday the company paid a visit to other friends at Buck Lake, where the picking of blueberries was the order of the day.

J. A. Halgren, a former resident of Winfield, passed away in the Wetaskiwin hospital on Thursday last. The late Mr. Halgren was for some time in charge of the Winfield hotel which was destroyed by fire, he also had a home south of the town.

The deceased left a large family to mourn his loss, among whom were Mr. and Mrs. Ben Stady of Winfield, Saskatchewan, and daughter.

The Winfield Cafe had as guests over the weekend, Mrs. Plumley of Edmonton, mother of Mrs. R. L. De Long, a former government nurse at Pelly, a government official, and a weed inspector from High River, were also spending the weekend there.

GWYNNE

The Crooked Lake Ladies' Aid will meet at the home of Mr. Arthur Carlson, on Thursday, August 31st.

NEW SWEDEN

Ray Harris had the misfortune to have his well vein in, and the Starky Bros. have been busy there during the past week.

Mrs. Clarence Pearson and family narrowly escaped serious injury when they were returning from Wetaskiwin on Sunday.

C. C. Corbett and Mr. Mackay of Edmonton, were business visitors here Tuesday.

A. L. Peterson is drilling a well for E. W. Alm.

Bill Popovich and Bill Butalla of Mayerthorpe, are here to harvest. They have taken a contract with E. W. Alm to stook his crop.

Steve Cherniawski of Camrose, is relieving Chris. Ashlund, who is on the sick list this week.

C. C. Corbett and Mr. Mackay of Edmonton, were business visitors here Tuesday.

In honor of Mrs. Landerahl Friday afternoon. A delicious luncheon was served by the ladies.

Harvest is in full swing. Clarence Pearson is in Bawlf for a few days.

Mr. and Mrs. Dettler and family of Olive, were guests of Albert Pearson on Thursday last.

MILLET

Mrs. J. A. McLean of Edmonton, spent the past week at the home of her aunt, Mrs. C. J. Golin.

The Misses Edith and Mildred Smith of Hughenden have visited friends here for the last two days while their parents, Rev. and Mrs. H. G. Smith have attended St. Stephen's summer school in Edmonton.

Other guests at Silver Bay Beach, Mulhurst, recently were: Mrs. A. P. Mitchell and Alice, Miss Doris Carl of Edmonton, Misses Margaret and Mildred.

Miss Barbara English is visiting her aunt and uncle Mrs. and Mr. J. A. English.

Mr. H. M. Johansen (nee Miss Annie Hope) of Portland, Oregon, is visiting her mother and brother, Mrs. J. Hope and Melvin, and her sister, Mrs. H. M. Johansen.

Our general milkman, Geo. Wassmuth, is having a sale Monday, and will be leaving shortly for Battleford, Sask. His business will be carried on by H. Warkatch, who bought the Higginson farm.

A large gathering of members and visitors of the church, took place on Sunday afternoon at Mrs. H. Arnold's residence. Rev. call "My Pet Economy" proved witty and interesting. Mrs. H. Arnold gave an account of the W. V. Conference at Lone Ridge, where a very good time was had by all.

A report on Legislation was given by Mrs. Leslie Mary. Both papers were much enjoyed. Five dollars was voted to the School Fair. A dainty lunch was served by the hostess and Mesdames H. Von Ars and H. Moonen.

The next meeting will be at Mrs. H. Moonen's. Roll call "Threshing Day" Paper on Current Events, on Sunday evening the United Church was packed. In fact seating room was at a premium. This is the first time in a year that the church has been filled to its capacity.

Monday evening the Young People's Club met at the church. The constitution of the club was adopted and over thirty young people signed the roll. This looks good for a bright future.

The newly-elected board of the church consists of Messrs. Carl, Wolfe, Olson, Hipkinson, Inglis, Barnd, and John and Mrs. Stuebe and Phillips. This group with the addition of the Supt. of Sunday School, President of the Ladies' Aid and President of the Young People's Society will direct the work of the church until December, 1934.

Canada's wheat still stood supreme at the recent grain show and conference held at a close at Regina.

Pocketing the biggest winnings of the \$100,000 in cash prizes, the Dominion's farmers saw their banner at the top of the market with prices ranging that demand for Canadian wheat from foreign countries would cut down the 1933 carryover. Experts who attended the show and conference were unanimous in praising the farmers' encouragement in disclosing European countries wanted the Canadian grain.

The big share of the prize money from all grains went to the Dominion. Its growers took \$64,573, more than double the \$25,526 which went to United States and \$8,224 won by farmers in countries other than Canada and the United States. Approximately \$2,600 of the prize money was not awarded, because judges felt some entries were not worthy.

A carryover of Canadian wheat of approximately 200,000,000 bushels, at the cereal year ended July 31, compared with 12,962,961 bushels at the same date of the close of the previous cereal year was a problem for farmers to ponder in view of their top-rated wheat.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being purchased in still larger quantities on international wheat markets. In a paper to the conference, Britain's noted marketing expert, Broomfield, declared it was protection by foreign countries which caused the difficulties.

All millers, Broomfield disclosed, did not and could not buy Canadian wheat because of high duties and milling restrictions of importing countries. Millers wanted Canadian wheat, and the conference was told, Canada's wheat will always be at a premium in the markets of the world. The message was echoed by other experts.

Led by the newly crowned wheat king, Frelaud Wilford, of Stavely, and the noted northern grower, Herman Trele, of Wembley, Alberta, captured the greatest share of the prize money going to Canadians. Alberta's earnings were \$25,152, almost equal to the total amount won by United States farmers.

RAILWAYS MAKE APPEAL

A joint appeal by heads of the Canadian Pacific and Canadian National railways was made Tuesday to all employees in their running trades to accept wage reductions in a spirit of co-operation with the management.

It had reference to the present wage dispute, over which the employees had decided to take a strike vote.

Renew your subscription to the Wetaskiwin Times now.

WORK OF LEGISLATURE

(Continued from Page 1)

ed revenue of \$15,400,000. In other words 50 cents out of every dollar received by the Government is taken for public debt charges. The consequence is that the Government has been forced, among other things, to reduce school grants, close one Normal School, eliminate health clinics, discontinue grants to municipalities for road purposes, reduce grants to school farms, boys' and girls' club work, the destruction of noxious weeds and old age pensions. The Browlee government had been obliged to borrow heavily from the Dominion government, and Mr. Bennett had notified the Premier that if he wished further accommodation from the Dominion he must balance the Budget.

In spite of the fact that Municipal Councils and other governing bodies both urban and rural were reducing their expenditures, the Government imposed new and increased old forms of taxation for 1933 by over \$2,000,000 as compared with 1931. The high interest paid on the Government bonds and individuals were imposing a very heavy burden and making it almost impossible to carry on the experience of the Government in this regard is a good example and as the principle of altering contracts by legislative action has already been adopted in the Crop Insurance Act, surely the setting of a low maximum interest rate, no matter the rate specified, to be regulated from year to year conditions must warrant, would be a fair and logical thing to do and he would support any move to accomplish this object.

He criticized the Government for not dealing courageously with the rural telephone problem. Had they in 1930 reduced the rates many farmers who discarded their telephones would have retained them. Every year since 1930 they have ordered out telephones by the thousands until now they are discarding them and the phones remain in use. The result is that the yearly loss is enormous and the Government has thrown up its hands in despair.

They are going to let the rural telephone business and if the farmers do not buy the rural lines they will be cut down whenever they reach a certain stage of disrepair for no more money will be spent to maintain them. These rural lines cost about \$50.00 per mile and the Government is offering to sell them at junk prices of about \$15.00 per mile. When we consider that little, if any, of the original cost has been paid, we can realize the immense loss that will have to be shouldered by the people of Alberta as a whole.

This is the result of the management of the Telephone Company, a private system by the present Government.

He pointed out the annoyance caused by so many frequent changes in legislation and regulation.

Then recently we have had another exhibition of hasty and ill-considered regulations. It was ordered that all dance halls were to be closed at 1 o'clock a.m. Another storm of protest arose and the order was rescinded in less than a month after being passed. These instances would indicate a lack of judgment on the part of the members of the Government and goes to show how erratic and unwise some of their decisions are.

Doing further with motor license fees criticized the government for its failure to deal in a fair and sensible manner with this question. At road last Session he had moved a resolution, seconded by Mr. Mitchell, that license fees should be reduced to a basis of \$1.00 per cylinder, which would average about \$5.00 per car. An increase of 2 1/2 cents per gallon in the gasoline tax would more than make up for the loss in license fees. This would adopt the sound principle that he who uses the road the most would contribute more for their maintenance and is in line with resolutions passed at the various conventions, including the U. F. A. Convention. An idle car in the shed is of no practical value to either the owner or the Government and its use should be encouraged, yet the Brownlee Government and all other parties in the House except the Liberals, voted against the motion and also paid the cost of the World Grain Exhibition at Regina, the Saskatchewan Government issued a special permit for fifty cents, which enabled the owner to operate the car without having to take out a license, to operate their cars during the continuance of the exhibition and thousands were brought into the many bearing a 1930 license plate.

The Government has repeatedly refused to earmark all monies received from Gasoline tax and motor license fees for road purposes and the practice of using part of this fund for other purposes was roundly criticized by the speaker. The estimated revenue from these sources this year is \$3,577,400.00, while the expenditure for the maintenance of the road system is \$3,577,400.00. The all office expense of the Public Works Department, cost of administration, together with interest and cost of carrying the highway investment amounts to \$2,256,500.00, leaving a balance of \$550,900.00 which the Government diverts to other purposes. This sum would build about 175 miles of standard gravelled road or over 100 miles of hard surfaced road, yet we have the highway department of the province going to pieces for lack of funds, and it has become necessary for the Government to borrow \$100,000 to carry out the highway program.

Wetaskiwin to Edmonton and a small section near Bowden. This figures out at about \$200.00 per mile and is a heavy burden on the ratepayers. money would build a hard surfaced and permanent road from Edmonton to Leduc which is the section in the province where the highways are in the worst condition.

Smilin' Charlie Says

Th' real gardener is th' feller who can keep up his enthusiasm fr' his garden all in th' hot days o' Summer

have been under the shadow of a powerful curse having been a very violent man. A long train of tragedies followed his death. The story is told of the death by burning of the lovely young widow of the sixth Lord of Glamis, her son having been tortured into falsely accusing his unhappy mother. The man who wove mystery into Glamis castle was Charles, sixth earl of Strathmore. He was said to be a terror and one Sunday night on being unable to find anyone to play cards with him he declared he would play with the devil himself. He locked himself away in a den but presently a cloaked figure appeared at the door. The devil himself! The earl later left the room to scatter curious servants who had gathered about the door and on his return the stranger had gone. But every Sunday night the tumult of sounds of card playing echoed from a room although no one was in it and these sounds could be heard long after the earl had been stabbed to death for cheating in a game. It is often asked if this is the room that contains the secret. Several secret chambers have been found from time to time in the castle, but this secret recess remains a mystery to all but the three mentioned. There are many theories concerning it. Some say it is the prison of a hideous half-human monster, and it is even said that a sort of human vampire is born into the Lyons house every generation. When the father of the present earl was asked about the room and its mystery, he replied, "If you could guess the nature of the secret, you would go down your knees and thank God it is not yours." He once told the Bishop of Brechin, a guest, that this position was of such an unusual nature that no outsider could ever help him. The castle is full of queer stairways and passages and its foundations are composed with dungeons in which men starved in days gone by. Its walls are 15 feet thick. One staircase was discovered in 1849 when some of the masonry was being made. It had been sealed up for 200 years. A beautiful fireplace was discovered recently that has been sealed up for centuries. The Lord Strathmore built many of these secret chambers and passages and he left behind him a curious book of records telling of curious alterations but no mention is made of the secret chamber. It is said by the writer that at long intervals, sometimes only twice in a century, the three in the secret, come together on the 21st birthday of the son and heir and armed with crowbars, disappear into the gloomy recesses of the castle.

Doors close after them. Looks grate. The secret of these three men is one of the greatest mysteries of this world, and since the Earl of Strathmore has said recently that he might be forced to divulge it due to harsh taxation, the question arises as to what would then happen to the secret of his castle if it were to pass into other hands.

CROPS DAMAGED, WINDOWS BROKEN, FARMERS INJURED

Calgary, Aug. 21.—Central Alberta farmers over the week-end suffered heavy damage to their crops from the season's worst hail storm. Carbon, Bowden, and Airdrie reported damage in some cases farmers' crops being totally ruined by the hail stones, described as large as hen's eggs.

From Carbon it was reported a man was taken to hospital suffering injuries from the hail stones.

Through the southern Alberta the week-end found heavy rains, too late to aid drought-stricken crops but an attempt to improve pasturage conditions.

Between Carbon and Craigmyle, hail raked a four-mile wide strip, destroying grain stands, breaking windows, and the accompanying wind tearing a roof off a barn. A granary on one farm was flattened. Bowden area reported a number of farmers huddled on with damage on other farms as high as 75 per cent. Airdrie reported hail damage from 25 to 75 per cent.

Heavy rain occurred in Calgary district, 1.12 inches of moisture falling Saturday and Sunday.

Drumheller, Aug. 21.—Jake Clements, farmer of the Murton district, was battered into insensibility Saturday when caught in the violent hail storm which swept over a twenty mile track three miles wide carrying destruction in its train.

Obituary

JOHN ALFRED HALLGREN

The funeral services of John Alfred Hallgren, age 60 years, 3 months and 24 days, who passed away on August 17th, at the Wetaskiwin Community hospital, was held on Friday afternoon at 3 p.m., from the Swedish Baptist church. Rev. P. M. Meyer officiated. The funeral service was held in the Wetaskiwin cemetery.

Deceased was born in Sweden and came to Canada and Alberta with his family in 1906, and has resided here since. The last 2 1/2 years they have resided in Wetaskiwin.

He is survived by his wife, four sons and eight daughters, also one sister and two brothers. The pallbearers were three of his sons and three of his sons-in-law. The floral tributes were many and very beautiful.

MRS. HULDA EFFERT

The death occurred at Westeroose on Sunday afternoon, August 20th, of Mrs. Hulda Effert, beloved wife of H. O. Effert, old timers of the Nashville district. The funeral service will be held from the Nashville Baptist church Thursday, August 24, at 2 p.m. Rev. P. M. Meyer will officiate.

ARNOLD CHARTERS NICHOLL

A gloom was cast over Wetaskiwin this week, when it was learned that Arnold Charters Nicholl had passed away in the Community hospital on Tuesday evening, where he had been a patient for a couple of weeks. He was aged twenty-five years, one month and twenty-two days. He was born near Stettler, and for several years had been an obliging and efficient clerk in Chalmers Hardware Store.

The funeral will take place on Friday of this week, service being held in the First United church commencing at three o'clock. The interment will be in the Wetaskiwin cemetery.

WETASKIWIN LEGION PICNIC ON LABOR DAY

The Canadian Legion Wetaskiwin Post held an executive meeting Tuesday evening to complete plans for the big picnic and dance to be held on Labor Day, Sept. 4th.

Any boys having ponies who wish to enter the pony races set in touch with Tom Palfrey or Harry Perler. The executive are planning for a big crowd and lots of fun.

Norman MacEchamers and Bob Inglis each think they are going to win the Veteran's race; it will be worth watching.

One Veteran claims to be a veteran of the China Rebellion. He was showing us his scars last night to prove it. It is an old scar left where a mule kicked him out of the line of fire, kicked him.

BORN

GREINER—In the Community hospital on the 21st inst., to Mr. and Mrs. Walter Greiner of Wetaskiwin, a daughter.

BANKERS IN ENGLAND

A. A. Berle, member of Roosevelt "Brain Trust" and Professor of Corporation Law at Columbia University, makes this statement: "In England a banker is not allowed to make

a fortune. He soon found himself out of a job if he gained the stock market, engaged in business outside his bank or undertook to himself up with outside groups. It is considered that he is paid for what he does—paid rather well. Sometimes he is even rewarded (at)

a peerage. But it is not the place to make a fortune.

When you see printing in a hurry, When it simply must come through, When the job is mighty particular—let The Times do it for you!

Alberta News Letter

(Issued by Publicity Commissioner,
Government Buildings, Edmonton,
Saturday, August 19, 1933.)

Junior Grain Competitions

Judging is now in progress by officials of the provincial department of agriculture of the field crop competitions of the junior grain clubs. There are this year 117 of these competitions, an increase of 45 from last year. Of these 46 are wheat, 31 oats, 31 alfalfa, 7 barley, 1 corn and potatoes. 1. The membership in the grain clubs now totals 1,583, and 113 clubs extend from Bow Island on the south to Girouxville and Grande Prairie on the north and as far west as Edson.

High School Courses by Mail

For some years the provincial department of education has conducted correspondence courses in the elementary grades of school for the convenience of those unable to attend a school. Some 2,500 or more, chiefly those in outlying parts of the province, have taken advantage of these. It is now the purpose of the department to extend these courses to include instruction in all four grades of high school work, with the exception of commercial and technical courses. A small fee of \$8 per unit will be charged to cover administrative costs.

Alberta's Success at Regina

A review of the winnings in the various seed grain classes at the world grain congress at Regina recently, shows Alberta's total prizes to be \$24,500, with an additional \$1,700 won by members of the junior, intermediate and inter-college grain judging teams. The cash prizes taken constituted more than one-third of the prize money offered in the classes concerned. In two classes of wheat Alberta took 85 per cent of the money, and in two classes of oats won 50 per cent of the money.

Summer School Attendance

A total attendance of 870 was recorded at the annual teachers' summer school just closed at the University of Alberta. This compared with 981 last year. The school was operated jointly by the university and department of education.

Prince's Ranch Model at Toronto

The model of the Prince of Wales ranch which attracted so much attention at Regina grain congress, is to be removed to Toronto national exhibition, and will also be on display at the Royal Winter Fair. The model is 120 feet long and is an almost perfect replica of the ranch in every detail.

That Burning, Itching, Stinging Skin Trouble, Eczema

Manufactured
for the past 34 years by
THE T. M. LEBURN CO., Limited
Toronto, Ont.

Those suffering from eczema know what torture is endured with the burning, itching and stinging that accompanies this disease, especially at night, when the hands are put in water, or when exposed to heat.

It is a blessing there is such a reliable remedy as Burdock Blood Bitters for those tortured, day and night, with eczema, and who can get no relief from their misery.

Take Burdock Blood Bitters internally and it purifies the blood of those poisons which are the cause of this eruption.

Apply it externally and it will help to take out the fine and itch, and aid in the healing process.

ism that comes into their hands, but the type of mechanical imagination that went into the original creation they are at a loss to duplicate.

The simple truth of the matter is that a man is practically unable to steer Japanese bombs to their mark because they haven't been able to develop bomb-sighting machinery.

As to why Japanese soldiers fight among themselves for the honor of being the bomb pilot who can look forward to being a hero to certain oblivion, that's a matter of psychology not so easy to understand. Patriotism rules the Japanese to an almost fanatical degree, and love of country is so bound up with religion — the emperor being regarded as an incarnate god — that to be blown up in a bomb to further the successes of Nippon becomes something to be desired above all things.

When one understands the popularity that harikari, a form of suicide by self-disembowling has had among the Japanese for centuries, the national willingness to die to death in a bomb, or in any other way, becomes credible.

Harikari, as formerly practised, was compulsory upon a noble of the higher class, and he received a courtously phrased message from the Mikado intimating that he must die for some offense of lawbreaking or dishonor. The Mikado, in a few felled dagger customarily sent by the Mikado for performing the act, proceeded in a prescribed ritual. Seated on a dais, surrounded by officials and friends, the suicide plunged the dagger into his stomach below the waist line on the left side, drove it slowly across to the right and turning it, gave a slight upward cut.

This compulsory suicide has been abolished, but the idea has such a striking appeal for the Japanese imagination that some 500 harikaris take place annually as a purely voluntary gesture.

A NOVEL WIRELESS

At the World Power Conference held in the Stockholm concert hall, a striking technical novelty was introduced enabling audiences at conventions to listen to lectures in several languages simultaneously. The moving about and without being disturbed by noises or by conversations between bystanders.

This new contrivance, called the conference telephone, constructed by the L. M. Erickson Telephone Company, is a portable wireless receiver consisting of a small receiver box fixed in the button-hole or placed in the left ear and a head phone. The transmitter antenna is mounted around the walls of the conference room, so that the bearer of the receiver outfit can sit or move anywhere in the room while listening to the lecture, undisturbed by conversation of other members of the audience.

Another great advantage is the possibility of interpreting a lecture in different languages simultaneously. The intervenors sit in an adjoining room and send their interpretations over different wave-lengths for each language. The listener only has to choose the receiver outfit tuned for the wave-length of the language he wishes to hear. This will naturally greatly shorten the duration of the proceedings and forms an elegant solution of the difficulties previously encountered at conferences when using the costly and complicated method with fixed telephone receivers at each seat with cords that are apt to get entangled and cause inconvenience.

This revolutionizing innovation was enthusiastically received by the 900 members of the conference, who also admired other electric installations, including signal lights in different colors indicating the different languages used and an automatic telephone system between the conference officials.—St. Thomas Times Journal.

Chief Justice Simmons scored foreign-born persons living in Canada who waited lengthy periods before applying for naturalization papers when John Charley Polley of Calgary, appeared before him. Polley, born in United States, had resided in Canada since 1910, the Court was informed. Chief Justice Simmons then criticized Americans, holding good jobs in Canada, and not applying for naturalization papers. "You couldn't do that in the United States. If you stayed in that country six months and did not make any effort to become a naturalized you would be told to get out," Chief Justice Simmons said.

A final decision not to re-open the Edmonton Normal school for the coming school year was announced by Hon. Perren Baker, minister of education.

THE WILSON FLY PAD CO., Hamilton, Ont.

Alberta Crop Report No. 9

(Issued by the Department of Agriculture, Edmonton, Saturday, August 19th, 1933.)

Cutting of the wheat crop in Alberta has commenced, and is fairly general in all parts save in the more northern districts. Cutting of coarse grains has also commenced in certain districts. The crops have ripened so rapidly under the continued warm, dry weather that harvesting has become general somewhat earlier than is usual.

While the Department is not at present issuing an official estimate of what the average yield of wheat over the province is likely to be, it has become certain that the total harvest of wheat will be far below that of 1932. Over a fairly well-defined area in the south-eastern part of the province, described roughly as extending from the South Saskatchewan river north to Township 33 and from Range 15 to the eastern boundary of the province, excluding irrigation areas, the crops have largely failed due to drought, and a

very large percentage of the seeded area will not be harvested, while on the balance the yield will be very light indeed. Over the balance of the province aside from this area, however, there will be a medium crop of wheat with estimates of yields ranging from 10 to 15 bushels in districts immediately adjacent to the drought area both south and north, to as high as 25 bushels in a few favored districts elsewhere in the province. Along the southern fringe of the province west and south-west of Medicine Hat, some fairly good yields are expected. The Peace River and Grande Prairie districts report conditions good, with prospects of good yields, though rain would be welcome in a few sections to aid the filling process.

As might be expected, the drought conditions affected the coarse grains more seriously than the wheat, and in most districts in the central and southern areas there will be a distinct shortage of greenfeed and other feed crops, although as in wheat there are districts in the north central areas more favored in this respect. An unusual situation has developed this year in the foothill country between High River and Pincher Creek, where pastures have burned under the prolonged dry, hot spell. Here, as in the dried-out crop areas, the feed situation has become more or less acute. The whole feed situation is now being reviewed by the Department to ascertain what action may be necessary.

Grasshoppers are still doing a little damage even though on the wing, but the percentage of loss from hoppers this season has been held down almost to the minimum, as a result of the intensive poisoning campaign effected during the early part of the growing season.

Precipitation Records

Precipitation records at various points reporting show the precipitation from April 1st to August 18th inclusive to be as follows: Medicine Hat 5.94 inches, Empress 4.23, Lethbridge 6.72, Macleod 5.34, Foremost 5.24, Cardston 5.87, Calgary 6.22.

Brooks 5.18, Drumheller 3.82, Coronation 6.29, Stettler 5.42, Red Deer 16.46, Vegreville 6.25, Lloydminster 7.69, Edmonton 5.93, Fairview 2.51, Beaverlodge 6.09.

At Lethbridge the ten-year average rainfall for the same period is quoted as above was 6.47 inches, at Medicine Hat was 5.75 inches, at Calgary was 10.75 inches, and at Edmonton was 5.54 inches, so that at Lethbridge and Medicine Hat the rainfall was practically normal this year, at Calgary it was below the ten-year average, and at Edmonton was above the average.

HOME

A home, to be a home, must be a place of love, of charity, of kindness, of cheer and laughter. Where tear-drops flow and laughter rings. And every one to mother brings Their sorrows, whether great or small, Seeking her comforting for all.

A home, to be a home, must be a haven on this earth, where we Revel in mother's home-made bread And see the halo round her head. Every member of the family must In God Almighty learn to trust. And never fail to say their prayers Beside their humble bed upstairs.

A home, to be a home, must be a place where folks drop in to see How the great world is treating us, Friends over whom we love to fuss, Just like they do when visit us. Their homes, to have a cup o' tea.

A home, to be a home, is this— A baby's coo, its warm, sweet kiss, Where little cheeks are smeared with jam.

And sweet's the scent of baking ham, And under many a chair there'll be Somebody's gun stuck carelessly.

—Tom Lloyd Layton.

The years 1900, 1901, 1902, 1904 were the wettest years that this country experienced. In 1902 it rained for 26 days in June, almost steadily and the country was flooded. The mosquitoes were very bad for the first few summers. The farmers had to tie the cloths around their heads while working in the fields, and smudges had to be built for the cattle.

LOOK OUT FOR THESE SYMPTOMS OF CONSTIPATION

Get Relief With Kellogg's ALL-BRAN

Headaches, loss of appetite and energy, sallow complexion, and sleeplessness are often warning signs of common constipation. Unless checked, constipation may impair health.

Today, you can get rid of common constipation by simply eating a delicious cereal. Laboratory tests show that Kellogg's ALL-BRAN provides "bulk" to exercise the intestines, and vitamin B to further aid regularity. ALL-BRAN is also a good source of blood-building iron.

The "bulk" in ALL-BRAN is much like that in leafy vegetables. Inside the body, it forms a soft mass. Gently, it clears the intestines of wastes. How much better than taking patent medicines.

Two tablespoons daily will overcome most types of constipation. Serious cases, with every meal. If not relieved this way, see your doctor.

Enjoy ALL-BRAN as a cereal, or use in cooking. Appetizing recipes on the red-and-green package. At all grocers. Made by Kellogg in London, Ontario.

"A good community paper," says the Estevan Mercury, "is not the product of chance. It is the growth of time, brains, energy, devotion and, essentially, the loyal support of the community it serves."

In a speech at Strome, Premier Brownlee predicted harder times during the approaching winter, on account of crop failures in many districts.

We can Supply you with All of them!

ROCK HEADS SEED GROWERS

Lacombe, Aug. 18.—P. J. Rock of Morrin was elected president of the Alberta branch, Canadian Seed Growers' association, at the experimental farm here, held in conjunction with one of the cereal field days. Few members were able to attend. The government was urged to utilize any public monies expended on distribution of seed in the purchase only of seed from inspected growers. Their aid was also sought toward securing of cheap transportation rates for seed.

L. H. Newman, dominion cerealist, was present. N. S. Fisher, Sedalia, was elected vice-president, and Dr. O. S. Aamodt of the university, returned as secretary. Charles Ball of Sedgewick, Mahlon Watson of Provost and T. H. Howes of Millet are directors.

Sweet Young Thing (driving through suburb): "Would you like to see where I was vaccinated?" He (with enthusiasm): "Sure." S.Y.T. (pointing toward house which they had just passed): "Well, right in there."

WEDDING CELEBRATED AT PIGEON LAKE BEACH PARTY

Ma-me-o Beach, Pigeon Lake, was the scene of a jolly gathering on Wednesday evening, when Mr. and Mrs. Alfred A. Ellis celebrated their 54th wedding anniversary. The affair was complimented Mr. and Mrs. George, Ortelb, of Winnipeg, who are visiting Mr. and Mrs. J. Walker, Mrs. Ortelb's parents. The party, which gathered around an immense bonfire on the beach, was arranged by Mrs. Alfred Ellis and Mrs. J. Walker, younger members of the summer colony arrived, later in the evening, joining in old-time songs. Mr. Clarence Miller of the bridegroom's wedding ceremony, in which those taking part were Mrs. Arnold Ellis, Mr. L. G. Kelley and little Peggy Kingzett. The bridegroom was of bridal roses tied with white satin streamers. Following the ceremony the bride couple were showered with presents presented by Mrs. Walker and Mrs. Ortelb. Supper

on the beach consisted of a wiener and marshmallow roast and the evening concluded with singing. Among those present were: Mr. and Mrs. N. P. Walt, Mr. and Mrs. Clarence Miller, Mr. and Mrs. Harrison, Miss Margaret Harrison, Mr. and Mrs. Sidney Keeling, Mrs. F. Kingzett, Miss Betty and Miss Jean Kingzett, Mr. and Mrs. R. B. Corley, Miss Lola Corley, all of Edmonton; Mr. and Mrs. Jack Walker, Mr. and Mrs. George Ortelb, Winnipeg; Misses Florence and Jean Walker, Mr. Jack Walker, Mr. and Mrs. W. H. Odell, Mr. and Mrs. C. Condie, Mr. and Mrs. Atkinson, Mr. and Mrs. Arnold Ellis, Mr. and Mrs. A. E. Millin, Dr. and Mrs. T. Stevenson, Lowell Stevenson, Dr. and Mrs. E. W. De Long, Mr. and Mrs. Blacwell and family, Mr. R. Muna, Mr. and Mrs. L. G. Kelley, Miss D. Kelley, Mrs. H. Souers, Mrs. J. C. Shillabeer, Mrs. J. Vickers, Mrs. Badley, Calgary; Mr. and Mrs. Greenwood, Camrose; Dr. and Mrs. W. H. Craig, Camrose; Miss Margaret Stevenson, Jean McMurdo, Miss Hazel Hanna, Miss Vivian Millin, Miss Merna Redman; Miss Iva Baldrey, Calgary; Mr. and Mrs. E. B. Baldrey, Calgary; Mr. and Mrs. H. Souers, Mrs. J. C. Shillabeer, Mrs. C. B. McMurdo, Mrs. T. Spencer, Mr. R. Heritage, Mr. and Mrs. William Gibson, Mr. Jack Walker, Mr. Ross Baker, Mr. Kenneth Smith, Mr. Walter English, Mr. Jimmy Garlough, Mr. Kenneth Kirstein, Mr. Robert Kirstein and many others.

The profitable production of farm crops depends upon many factors—weather conditions, choice of crops and varieties, the practices followed in producing—harvesting, storing, feeding or marketing, and not least the nature of the soil and the way it is treated or managed.

"Why do you call your house a bungalow?"
"Well, if it isn't a bungalow, what is it? The builder made a bungle of it and I still owe for it."
